

Lesson 16 – Jobs & Occupations

Welcome to lesson 16! You've made it to the final lesson in this course and we hoped that your vocabulary has expanded over these past 16 weeks. For the final lesson, we will be teaching you words for jobs and things in and around the workplace. These should really prove to be helpful if you plan on working in Korea. You can also use these words to ask people about their jobs and workplace for small talk and getting to know someone.

With that, let's get started!

Korean work culture is probably much different than what you're used to. There is a strict hierarchy, especially at the office branches of the big companies. You pretty much stay until the boss leaves, even if you have no work to do. Things are slowly changing, but it is still common. 회식 are also still common, although being forced to go out for these gatherings is changing as well.

This can be stressful for people as these work gatherings are during the week, and they have to get and go to work in the morning. With things changing, more companies are allowing workers to decline these gatherings or go out for a coffee or movie instead.
