

# Lesson 5 - Travel

Welcome to lesson 5! In this lesson, we are going to be covering vocabulary related to travel in Korean.

Learning these words will be very useful especially if you plan on taking a trip to Korea or plan on living there for an extended amount of time.

Although most workers at the airport in Korea will speak English, this may not be the case if you happen to transfer at a smaller airport so knowing the above will help you navigate the basics of the airport.

For the words 도착 and 출발, these can also be turned into verbs:

도착하다 - to arrive

출발하다 - to depart

Example sentences:

공항에 지금 도착했어요. - I've arrived at the airport just now.

## Modes of Transportation

People frequently get confused with 기차 and 열차 which is another word for a type of train. 기차 refers to regular long distance trains while 열차 is used for intercity trains and subways. You would never use 기차 for subways.

If you are traveling to Korea, you will always find tons of taxis and express buses/airport limousines once you leave the airport. I would advise you to take an

express bus as it will be cheaper, and you can avoid some taxi drivers who may drive to drive up the price.

There is also an airport subway line that goes directly into Seoul which is only about \$3 for a ticket, so keep that in mind if you are staying in the city.
